

Bridging the Gap Between Pediatric and Adult Oncology: Addressing Unique Needs for Adolescents and Young Adults

Join us for a free webinar

Tuesday, Nov. 16, 2021
Noon to 1 p.m.

BRIDGING THE GAP

The United States reported 89,500 AYA (Adolescents and Young Adults) cancer diagnoses for 2020. AYAs have unique needs that go unnoticed and can lead to inferior outcomes. Beaumont Children's Gilbert Family AYA Program was designed to address the disparities teens and young adults face through their cancer journey.

Join us for a free webinar and learn of ways to address gaps in care and how we are building a model that health systems can adopt to improve AYA care.

COURSE OVERVIEW

During this course, attendees will gain knowledge of the challenges AYAs face, the importance of specialized care for this vulnerable population and the role health care providers play in improving care for teens and young adults.

OBJECTIVES

- Recognize existing disparities in the AYA population (age, clinical research, diagnoses etc.)
- Identify ways to improve referral patterns within a health care setting
- Discuss reasons why AYAs need unique care and services

This activity is approved for physician CME, ANCC contact hour(s) and Social Work CE and open to Beaumont providers and employees only.
